

Composite: MFS Emerging Markets Equity Composite in EUR

Custom Benchmark: MSCI Emerging Markets (net div) Index linked to previous benchmark

Creation Date: 13-Sep-2005

Inception Date: 01-Jan-2000

Composite Description: The MFS Emerging Markets Equity Composite includes all discretionary portfolios managed to the MFS Emerging Markets Equity strategy. The strategy seeks capital appreciation through investment in a diversified portfolio of stocks of firms in emerging market countries. Stock selection is based solely on MFS proprietary research process and, therefore, excludes assets managed by external parties or non-MFS sub-advisors. Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, geopolitical and economic instability than developed markets. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Institutional Separate Accounts Fee Schedule

| Asset Breakpoints (EUR) | Fee |
|---------------------------------|-------|
| For Assets Up To 50 MM | 80 bp |
| For Assets From 50 MM To 100 MM | 75 bp |
| For Assets Over 100 MM | 70 bp |

Accounts are eligible for inclusion in the composite if they have assets greater than 1 MM USD (1 MM EUR). Accounts are included as of their first full month of performance.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in EUR (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Certain institutional accounts hold Canadian trusts subject to custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in EUR. Source of Benchmark Performance: FACTSET ®.

Custom Benchmark: MSCI Emerging Markets (net div) - a market capitalization-weighted index that is designed to measure equity market performance in the global emerging markets.

Custom Benchmark Methodology: Prior to 1-Jan-2014 the benchmark was MSCI Emerging Markets - Gross Return Index and on 1-Jan-2014 the benchmark is linked to MSCI Emerging Markets (net div).

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

The MFS Emerging Markets Equity composite is a U.S. Dollar based composite available globally. The regional composite depicted here was created on 27-Jun-2011 for presentation in the European market. Where appropriate, data has been converted to Euro and the fees and breakpoints depicted are applicable to clients in this market.

Prior to 1-July-2014, the maximum institutional separate account fee charged for this product was 90 bps. From 1-Jul-2014 through 30-Jun-2020, the maximum institutional separate account fee charged for this product was 90 bps.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
