

Composite: MFS Global Concentrated Equity Composite in NZD

Benchmark: MSCI The World Index - Net Return

Creation Date: 28-Mar-2007

Inception Date: 01-Apr-2007

Composite Description: The MFS Global Concentrated Equity Composite includes all discretionary portfolios managed to the MFS Global Concentrated Equity strategy that do not have extensive guideline restrictions. The strategy seeks long-term growth of capital through investments in a concentrated portfolio of twenty to thirty global companies with durable above-average growth and return prospects and reasonable valuation. The portfolio's performance could be more volatile than the performance of more diversified portfolios. Investments in certain markets can involve greater risk and volatility because of adverse market, currency, economic, industry, political, regulatory, geopolitical, or other conditions. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Institutional Separate Accounts Fee Schedule

Asset Breakpoints (NZD)	Fee
For Assets Up To 75 MM	80 bp
For Assets From 75 MM To 150 MM	65 bp
For Assets Over 150 MM	55 bp

Accounts are eligible for inclusion in the composite if they have assets greater than 1 MM USD (1.8 MM NZD). Accounts are included as of their first full month of performance.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in NZD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in NZD. Source of Benchmark Performance: FACTSET ®.

MSCI World Index - Net Return - a market capitalization-weighted index that is designed to measure equity market performance in the global developed markets.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

Historical performance results may have differed had the composite included assets of client accounts during these time periods for various reasons including the impact of cash flows.

The MFS Global Concentrated Equity composite is a US Dollar based composite available globally. The regional composite depicted here was created on 27-Jun-2011 for presentation in the New Zealand market. Where appropriate, data has been converted to New Zealand Dollar and the fees and breakpoints depicted are applicable to clients in this market.

Prior to 1-Jul-2020, the maximum institutional separate account fee charged for this product was 85 bps.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
