

Composite: MFS International Research Equity Composite in CAD

Benchmark: MSCI EAFE - Net Return

Creation Date: 30-Jun-1998

Inception Date: 01-Jul-1998

Composite Description: The MFS International Research Equity Composite includes all discretionary portfolios managed to the MFS International Research Equity strategy. The strategy seeks capital appreciation by investing in equities of companies whose primary activities lie outside the United States and represent the highest conviction ideas of the MFS International Research analysts while maintaining a sector neutral weighting relative to the MSCI EAFE. Investments in certain markets can involve greater risk and volatility because of adverse market, currency, economic, industry, political, regulatory, geopolitical, or other conditions. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in CAD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in CAD. Source of Benchmark Performance: FACTSET®.

MSCI EAFE - Net Return - a market capitalization-weighted index that is designed to measure equity market performance in the developed markets, excluding the U.S. and Canada.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

The MFS International Research Equity composite is a US Dollar based composite available globally. The regional composite depicted here was created on 28-Jun-2011 for presentation in the Canadian market.
