

Composite: MFS Large Cap Value Concentrated Equity Composite in GBP

Benchmark: Russell 1000® Value - Total Return

Creation Date: 14-May-2012

Inception Date: 01-Feb-2012

Composite Description: The MFS Large Cap Value Concentrated Equity Composite includes all discretionary portfolios managed to the MFS Large Cap Value Concentrated strategy. The strategy seeks capital appreciation and reasonable income by investing principally in a concentrated portfolio of high-quality large capitalization companies, with durable business franchises, trading at attractive valuations. The strategy focuses on investing in the stocks of companies it believes are undervalued compared to their perceived worth (value companies). The strategy focuses on investing in securities of U.S. companies but may also invest in non-U.S. securities. The portfolio's performance could be more volatile than the performance of more diversified portfolios. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions. The portfolio's investments can continue to be undervalued for long periods of time, not realize their expected value, and be more volatile than the stock market in general.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in GBP (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in GBP. Source of Benchmark Performance: FACTSET ®.

Russell 1000® Value - Total Return - constructed to provide a comprehensive barometer for the value securities in the large-cap segment of the U.S. equity universe. Companies in this index generally have lower price-to-book ratios and lower forecasted growth values.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

The MFS Large Cap Value Concentrated Equity Composite is a US Dollar based composite available globally. The regional composite depicted here was created on 7-Feb-2024 for presentation in the British market. Where appropriate, data has been converted to British Pound and the fees and breakpoints depicted are applicable to clients in this market.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
