

Composite: MFS Research Equity Composite in CAD

Benchmark: S&P 500 - Total Return

Creation Date: 31-Dec-1997

Inception Date: 01-Jan-1989

Composite Description: The MFS Research Equity Composite includes all discretionary portfolios managed to the MFS Research Equity strategy that seek to outperform the S&P 500 Index over a full market cycle. The strategy seeks to provide long-term growth of capital through investment in a broadly diversified portfolio of primarily large-capitalization U.S. stocks driven by active stock selection that represents the highest conviction ideas of the MFS Equity Research Analysts. The strategy uses bottom-up analysis to identify high quality (resilient franchises, durable earnings and/or free cash flow growth, strong balance sheet, and strong management team) companies with above average, durable earnings growth potential and is managed generally as sector neutral relative to S&P 500 Index. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in CAD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in CAD. Source of Benchmark Performance: FACTSET ®.

S&P 500 - Total Return - a market capitalization-weighted index of 500 widely held equity securities, designed to measure broad U.S. equity performance.

The MFS Research Equity composite is a US Dollar based composite available globally. The regional composite depicted here was created on 27-Jun-2011 for presentation in the Canadian market. Where appropriate, data has been converted to Canadian Dollar and the fees and breakpoints depicted are applicable to clients in this market.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
