Benchmark: Standard & Poor's North American Technology Sector Index

Creation Date: 31-Mar-2000

Inception Date: 01-Apr-2000

Composite Description: The MFS Technology Equity Composite includes all discretionary portfolios managed to the MFS Technology Equity strategy. The strategy seeks capital appreciation through investments in companies that MFS believes have above average growth potential and will benefit from technological advances and improvements. Investments in the technology sector can be very volatile because of the rapid pace of product change, technological developments, and other factors. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in AUD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in AUD. Source of Benchmark Performance: FACTSET ®.

Standard & Poor's North American Technology Sector Index - a modified market capitalization-weighted index that measures the performance of selected technology stocks.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

Beginning in September 2008, regulatory restrictions were placed upon short sales. However, this did not impair the ability of funds in this composite to implement their defined management objectives.

The MFS Technology Equity composite is a US Dollar based composite available globally. The regional composite depicted here was created on -24-Oct-2007 for presentation in the Australian market. Where appropriate, data has been converted to Australian Dollar and the fees and breakpoints depicted are applicable to clients in this market.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
