

Composite: MFS Prudent Capital EUR Hedged Composite

Custom Benchmark: Prudent Capital EUR Hedged Blended Benchmark

Creation Date: 16-Jun-2022

Inception Date: 01-Jan-2022

Composite Description: The MFS Prudent Capital EUR Hedged Composite includes all discretionary portfolios managed to the MFS Prudent Capital strategy that have currency hedged to the Euro. The strategy seeks capital appreciation by investing in global stocks and debt securities and using cash and/or derivatives to mitigate downside risks for the strategy by reducing the overall market exposure. The strategy aims to identify best opportunities across region, sector, and capital structure and may invest without limit in equity and debt instruments of corporate and government issuers based on its view of the relative value of different types of securities and/or other market conditions. MFS' assessment of the risk/return potential of asset classes, markets and currencies and its adjustments to the portfolio's exposure to asset classes, markets and currencies may not produce intended results and/or can lead to an investment focus that results in the portfolio underperforming other portfolios that invest in similar investment types or have similar investment strategies and/or underperform the markets in which the portfolio invests. Investments in certain markets can involve greater risk and volatility because of adverse market, currency, economic, industry, political, regulatory, geopolitical, or other conditions. Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk.

Institutional Separate Accounts Fee Schedule

Asset Breakpoints (EUR)	Fee
For Assets Up To 50 MM	75 bp
For Assets From 50 MM To 100 MM	65 bp
For Assets Over 100 MM	55 bp

Accounts are eligible for inclusion in the composite if they have assets greater than 10 MM USD (9.7 MM EUR). Accounts are included as of their first full month of performance.

Derivative Exposure Disclosure

Period	Composite and Benchmark Return %			Composite Dispersion	Accounts in Composite at End of Period	Annualized 3-Year Standard Deviation		Assets (EUR million)	
	Gross of fees	Net of fees^	Benchmark			Composite	Benchmark	Composite	Firm

MFS Investment Management® claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MFS Investment Management has been independently verified for the periods 1-Jan-1988 through 31-Dec-2023. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Past performance is no guarantee of future results. Performance for periods less than one year are not annualized.

Total Gross of fee returns in EUR (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in EUR. Source of Benchmark Performance: FACTSET ®.

Custom Benchmark: ICE BofA Euro Treasury Bill (EUR Unhedged) - tracks the performance of EUR denominated sovereign bills publicly issued by Euro member countries in either the eurobond market or the issuer's own domestic market. ICE BofA US Treasury 1-5 Yr (EUR Hedged) - a subset of the ICE BofA US Treasury Index including all securities with a remaining term to final maturity less than 5 years. ICE BofA US Corporate (EUR Hedged) - tracks the performance of US dollar denominated investment grade corporate debt publicly issued in the US domestic market. MSCI World Index (net div) - a market capitalization-weighted index that is designed to measure equity market performance in the global developed markets.

Custom Benchmark Methodology: The custom benchmark blend consists of 20% ICE BofA Euro Treasury Bill (EUR Unhedged), 20% ICE BofA US Treasury 1-5 Yr (EUR Hedged), 15% ICE BofA US Corporate (EUR Hedged), 45% MSCI World Index (net div). Rebalanced monthly.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

For purposes of GIPS compliance, the firm is defined as MFS Investment Management (MFS), which is comprised of Massachusetts Financial Services Company and MFS Institutional Advisors, Inc. (MFSI), each of which is a registered investment advisor, MFS Heritage Trust Company, a New Hampshire Trust company, and MFS Investment Management Canada Limited. Total firm assets include assets managed by Massachusetts Financial Services Company, MFSI, MFS Heritage Trust Company and MFS Investment Management Canada Limited as well as assets managed by Massachusetts Financial Services Company and MFSI in a sub-advisory capacity on behalf of affiliated investment advisors that may or may not be registered under the United States Investment Advisers Act of 1940, such as MFS International (U.K.), Ltd. (MIL UK) and MFS Investment Management K.K. (MIMKK), MFS International Singapore Pte. Ltd, MFS International Australia Pty Ltd, and MFS Investment Management Company (Lux) S.à r.l as well as assets managed by Massachusetts Financial Services Company and MFSI on behalf of unaffiliated investment advisors that are not registered under the United States Investment Advisers Act of 1940.

The firm's list of composite descriptions, list of pooled fund descriptions for limited distribution pooled funds, and list of broad distribution pooled funds are available upon request. Additionally, policies for valuing investment, calculating performance, and preparing GIPS Reports are available upon request.

Certain accounts in this composite utilize derivatives for hedging, investment exposure, implementation efficiency, and transaction cost mitigation purposes. Derivative exposures can be volatile, used to take long or short positions, involve leverage (which can magnify gains or losses), and involve counterparty and liquidity risk. The table below displays the high, median, and low month-end derivative exposures over the last three years, when available or since inception if the composite is less than three years old. Derivative exposure of the account is calculated as the gross equivalent exposure of total net assets. The derivative exposures, displayed below, are the average exposures of the accounts that held derivatives.

LONG EXPOSURE		SHORT EXPOSURE	
High	180.93%	High	-185.76%
Median	114.01%	Median	-125.14%
Low	97.20%	Low	-104.48%
