

**Composite:** MFS Canadian Research Equity Composite

**Benchmark:** S&P/TSX Capped Composite

**Creation Date:** 28-Nov-2012

**Inception Date:** 01-Nov-2012

**Composite Description:** The MFS Canadian Research Equity Composite includes all discretionary portfolios managed to the MFS Canadian Research Equity strategy. The strategy seeks long-term capital appreciation by investing primarily in companies that are domiciled in or have economic ties to Canada that offer a large discount to fair value based on either stronger than expected earnings growth or undervalued business models that represent the highest conviction ideas of the MFS equity research analysts. Because the portfolio may invest a substantial amount of its assets in issuers located in a single country or in a limited number of countries, it may be more volatile than a portfolio that is more geographically diversified. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

**Institutional Separate Accounts Fee Schedule**

Asset Breakpoints (CAD)	Fee
For Assets Up To 50 MM	30 bp
For Assets From 50 MM To 100 MM	25 bp
For Assets Over 100 MM	20 bp

Accounts are eligible for inclusion in the composite if they have assets greater than 1 MM USD (1.4 MM CAD). Accounts are included as of their first full month of performance.

Performance for periods less than one year are not annualized.

Total Gross of fee returns in CAD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Certain institutional accounts hold Canadian trusts subject to custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in CAD. Source of Benchmark Performance: FACTSET ®.

S&P/TSX Capped Composite - Comprises the majority of market capitalization for Canadian-based, Toronto Stock Exchange listed companies with the relative weight by market capitalization of any single index constituent is capped at 10%.

Historical performance results may have differed had the composite included assets of client accounts during these time periods for various reasons including the impact of cash flows.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

Prior to 1-May-2017, the maximum institutional separate account fee charged for this product was 75 bps. From 1-May-2017 through 30-Sep-2020, the maximum institutional separate account fee charged for this product was 40 bps.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
