

Composite: MFS Canadian Research Equity Plus Composite

Custom Benchmark: Canadian Research Equity Plus Blended Benchmark

Creation Date: 02-Oct-2017

Inception Date: 01-Oct-2017

Composite Description: The MFS Canadian Research Equity Plus Composite includes all discretionary portfolios managed to the MFS Canadian Research Equity Plus strategy. The strategy seeks long-term capital appreciation by investing primarily in companies that are domiciled in or have economic ties to Canada that offer a large discount to fair value based on either stronger than expected earnings growth or undervalued business models that represent the highest conviction ideas of the MFS equity research analysts. The strategy may also invest in high quality global companies that represent the highest conviction ideas of the global research sector teams. Because the portfolio may invest a substantial amount of its assets in issuers located in a single country or in a limited number of countries, it may be more volatile than a portfolio that is more geographically diversified. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Performance for periods less than one year are not annualized.

** Indicates partial period.

Total Gross of fee returns in CAD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Certain institutional accounts hold Canadian trusts subject to custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in CAD. Source of Benchmark Performance: FACTSET ®.

Custom Benchmark: S&P/TSX Capped Composite Index - Comprises the majority of market capitalization for Canadian-based, Toronto Stock Exchange listed companies with the relative weight by market capitalization of any single index constituent is capped at 10%. MSCI AC World Index - Net Return - a market capitalization-weighted index that is designed to measure equity market performance in the global developed and emerging markets.

Custom Benchmark Methodology: The custom benchmark blend consists of 75% S&P/TSX Capped Composite Index, 25% MSCI AC World Index - Net Return. Rebalanced monthly.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

Prior to 1-Oct-2020, the maximum institutional separate account fee charged for this product was 40 bps.

The composite asset minimum changed from 2MM USD to 1MM USD effective 1-Nov-2022.
