

**Composite:** MFS International Concentrated Equity ex EM Composite

**Benchmark:** MSCI EAFE - Net Return

**Creation Date:** 03-Aug-2023

**Inception Date:** 01-Jul-2023

**Composite Description:** The MFS International Concentrated Equity ex EM Composite includes all discretionary portfolios managed to the MFS International Concentrated Equity ex EM strategy that do not have extensive guideline restrictions. The strategy seeks capital appreciation by investing principally in a concentrated portfolio of equities of companies whose primary activities lie outside of the United States. Portfolios in this strategy seek companies that provide above-average, durable earnings growth and whose stocks trade at a discount to their expected growth rate. Portfolios in this strategy are typically concentrated in 25-35 stocks. The portfolio's performance could be more volatile than the performance of more diversified portfolios. Investments in certain markets can involve greater risk and volatility because of adverse market, currency, economic, industry, political, regulatory, geopolitical, or other conditions. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

Performance for periods less than one year are not annualized.

\*\* Indicates partial period. <sup>^</sup>Indicates COMPOSITE and/or BENCHMARK is not presented because 36 monthly returns are not available.

Total Gross of fee returns in USD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in USD. Source of Benchmark Performance: FACTSET ®.

MSCI EAFE - Net Return - a market capitalization-weighted index that is designed to measure equity market performance in the developed markets, excluding the U.S. and Canada.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.
