

Composite: MFS Emerging Markets Debt Diversified Responsible Composite

Benchmark: JP Morgan Custom EMBI Global Diversified with PFV Exclusions Index

Creation Date: 19-May-2023

Inception Date: 01-Mar-2023

Composite Description: The MFS Emerging Markets Debt Diversified Responsible Composite includes all discretionary portfolios managed to the MFS Emerging Markets Debt Diversified Responsible strategy while adhering to responsible guidelines. The strategy focuses on hard currency sovereign debt issued by emerging market countries and may opportunistically invest in hard currency corporate debt issued by companies located in emerging market countries as well as local currency sovereign rates and currencies. Investment decisions are made through a research-intensive process integrating a top-down assessment of global risk with bottom-up country selection. Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, geopolitical and economic instability than developed markets. Investments in debt instruments may decline in value as the result of, or perception of, declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall). Therefore, the portfolio's value may decline during rising rates.

Institutional Separate Accounts Fee Schedule

Asset Breakpoints (USD)	Fee
For Assets Up To 50 MM	45 bp
For Assets From 50 MM To 100 MM	40 bp
For Assets Over 100 MM	37.50 bp

Accounts are eligible for inclusion in the composite if they have assets greater than 25 MM USD. Accounts are included as of their second full month of performance.

Derivative Exposure Disclosure

Period	Composite and Benchmark Return %			Composite Dispersion	Accounts in Composite at End of Period	Annualized 3-Year Standard Deviation		Assets (USD million)

MFS Investment Management® claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MFS Investment Management has been independently verified for the periods 1-Jan-1988 through 31-Dec-2023. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Past performance is no guarantee of future results.

Performance for periods less than one year are not annualized.

** Indicates partial period. ^Indicates COMPOSITE and/or BENCHMARK is not presented because 36 monthly returns are not available.

Total Gross of fee returns in USD (includes both capital appreciation and reinvestment of income) are net of transaction costs, withholding taxes and direct expenses, but before management fees, custody and other indirect expenses. Typical separate accounts utilize 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark.

Net of fee returns presented in this table are gross of fee returns reduced by management fees and performance fees if applicable (actual fees). For certain accounts where the actual fees are unavailable, the maximum applicable annual institutional separate account fees were applied.

Total returns of the benchmark are provided for each period depicted, expressed in USD. Source of Benchmark Performance: FACTSET ®.

JP Morgan Custom EMBI Global Diversified with PFV Exclusions Index - tracks the total returns of USD-denominated debt instruments issued by emerging markets, sovereign and quasi-sovereign entities: Brady bonds, loans, and Eurobonds. The index, which is a uniquely weighted version of the EMBI Global Index, limits the weights of those index countries with larger debt stocks by only including specified portions of these countries' eligible current face amounts of debt outstanding and excludes companies that are based on their classifications, for example, climate policy, controversial weapons, country policy, fossil fuels, tobacco, etc. It is a custom ESG benchmark that excludes companies and countries based on the clients comprehensive ESG policy. Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

For purposes of GIPS compliance, the firm is defined as MFS Investment Management (MFS), which is comprised of Massachusetts Financial Services Company and MFS Institutional Advisors, Inc. (MFSI), each of which is a registered investment advisor, MFS Heritage Trust Company, a New Hampshire Trust company, and MFS Investment Management Canada Limited. Morgan Securities LLC ("JPMS") (the "Index Administrator") does not sponsor, endorse or otherwise promote any security or financial product or transaction (each the "Product") referencing any of the Indices.

Certain accounts in this composite utilize derivatives for hedging, investment exposure, implementation efficiency, and transaction cost mitigation purposes. Derivative exposures can be volatile, used to take long or short positions, involve leverage (which can magnify gains or losses), and involve counterparty and liquidity risk. The table below displays the high, median, and low month-end derivative exposures over the last three years, when available or since inception if the composite is less than three years old. Derivative exposure of the account is calculated as the gross equivalent exposure of total net assets. The derivative exposures, displayed below, are the average exposures of the accounts that held derivatives.

LONG EXPOSURE		SHORT EXPOSURE	
High	33.84%	High	-23.99%
Median	25.45%	Median	-13.42%
Low	16.66%	Low	-7.26%
