

Composite: MFS International Equity ADR SMA Composite

Benchmark: MSCI EAFE - Net Return

Creation Date: 15-Oct-2024

Inception Date: 01-Mar-1996

Composite Description: The MFS International Equity ADR SMA Composite includes all fully discretionary portfolios managed to the MFS International Equity ADR SMA strategy. This strategy is substantially similar to the MFS International Equity strategy with certain differences in implementation. The MFS International Equity strategy is designed for investors that have a direct relationship with MFS. The MFS International Equity ADR SMA strategy is designed for retail investors where the strategy will be implemented through a wrap sponsor program. The strategy seeks capital appreciation by investing principally in a diversified portfolio of equities whose primary activities lie outside of the United States. Portfolios in this strategy seek companies that provide above-average, durable earnings growth and whose stocks trade at a discount to their expected growth rate. Effective 10/01/2024, the MFS International Equity ADR SMA Composite includes only portfolios managed under the MFS International Equity ADR SMA strategy. Prior to 10/01/2024, no portfolios in the composite were managed under the MFS International Equity ADR SMA strategy, therefore, the performance shown includes that of the MFS International Equity Composite. Investments in certain markets can involve greater risk and volatility because of adverse market, currency, economic, industry, political, regulatory, geopolitical, or other conditions. Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions.

MFS Investment Management® claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MFS Investment Management has been independently verified for the periods 1-Jan-1988 through 31-Dec-2023. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. Performance for periods less than one year are not annualized.

Total SMA Gross of fee returns (includes both capital appreciation and reinvestment of income) are in USD terms and net of all transaction costs, but before fees and expenses both direct and indirect. Retail funds and certain sub-advised accounts are subject to Fair Valuation as conditions warrant. Typical separate accounts utilize WM/Reuters 4:00 PM (London Time) foreign exchange rates; retail products will use rates deemed most appropriate for daily NAV per share calculations. The possibility exists for performance dispersion between otherwise similarly managed accounts and also with the benchmark. Management fees for this product style are described in full in Form ADV Part 2 which is available upon request.

Net composite returns are prepared by subtracting from the monthly gross returns one-twelfth of the maximum applicable annual wrap fee.

Total returns of the benchmark are provided for each period depicted, expressed in USD. Source of Benchmark Performance: FACTSET ®.

MSCI EAFE - Net Return - a market capitalization-weighted index that is designed to measure equity market performance in the developed markets, excluding the U.S. and Canada.

Composite Dispersion is measured by the asset-weighted standard deviation of gross of fees account returns for all accounts in the composite for the full period. For composites containing less than six accounts for the full period, dispersion is deemed not meaningful and is not presented. The three-year annualized ex post standard deviation measures the variability of the gross of fees composite returns and the benchmark returns over the preceding 36-month period.

Historical performance results may have differed had the composite included assets of client accounts during these time periods for various reasons including the impact of cash flows.

Accounts are included on their first full calendar month of performance. From 1-Jan-2015 to 31-Oct-2022, the accounts are eligible for inclusion in the composite if they have assets greater than 2 MM USD. From 1-Nov-2022 to 30-Sep-2024, accounts are eligible for inclusion in the composite if they have assets greater than 1 MM USD. As of 1-Oct-2024, there is no account asset minimum.

To date, MFS does not manage any actual bundled/wrap fee portfolios to this strategy and the composite consists entirely of proprietary assets as of 1-Oct-2024.
