**Notice to shareholders — Source of Distribution for Dividends**

**Date: 9/30/2022**

The amounts indicated below represent the estimated sources, other than net income, of the distribution made by your fund(s) for the month on a per share basis. This notice is only an estimate, actual results of operations may be different. This information is not being provided for tax-reporting purposes. The Fund will notify shareholders of amounts for use in preparing 2022 income tax forms in early 2023.

<b>Fund Name</b>	<b>Gains from the Sale of Securities and Other Properties</b>	<b>Other Capital Source</b>
MFS Emerging Markets Debt Local Currency Fund*	\$0.00000	\$0.01332
MFS Global Opportunistic Bond Fund*	\$0.00000	\$0.01021

The remainder of each distribution is estimated to be from each fund's net income.

\*As of August 31, 2022, the estimated percentage of aggregate distributions paid in the current fiscal year from Other Capital sources for the MFS Emerging Markets Debt Local Currency Fund and MFS Global Opportunistic Bond Fund is 45% and 65%, respectively. The estimated percentage is applied to all distributions paid fiscal year to date through August 31, 2022, and may change each month due to fund activity. Each Fund estimates that it has distributed more than its income and realized capital gains, therefore, a portion of your distribution may be from Other Capital sources. Other Capital sources may include a return of capital which cannot be determined until after the fiscal year end of each Fund. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. A return of capital distribution does not necessarily reflect the fund's investment performance and should not be confused with "yield" or "income".
